EXPERIENCE

Yosicare Private Limited | Software Developer

Coimbatore | August 2024 – September 2026

- Led end-to-end integration of “Reserve with Google” single-handedly (entity, action and services data feeds), enabling real-time appointment booking visibility across 50 practice locations; recognized company-wide by the Product Head.
- Took over 75% of a departing Data Analyst’s reporting within one week by reverse-engineering undocumented query logic; delivered provider-level product usage reports per location for 80+ practices, used directly for client invoicing; appreciated by the CEO.
- Retained an at-risk client by building a custom Node.js reporting pipeline from scratch, delivering 30 reports per month in their exact required format.
- As L2 support developer, fixed production issues with SQL and built Node.js automation scripts that cut about 12 hours of manual work per week.

KodNest Technologies | Software Developer Intern

Bengaluru | July 2023 – March 2024

- Built and maintained full-stack Java applications (Java, Spring Boot, HTML, CSS, JavaScript) and server-side apps with Node.js and Express.js.
- Designed and managed MySQL databases for efficient data storage and retrieval.

SKILLS

Languages:	JavaScript, PHP, SQL, HTML, CSS
Frameworks:	Node.js, Express.js
Cloud / AWS:	Lambda, S3, API Gateway, CloudWatch
Databases:	MySQL, PostgreSQL, MongoDB
Tools:	Postman, GitHub, Bitbucket, DBeaver, VS Code

PROJECTS / OPEN-SOURCE

Automated Appointment Processing (Serverless)

Node.js, AWS Lambda, S3, MySQL

- Designed a serverless pipeline where Lambda (Node.js) ingests and validates 50+ SIU/ADT files per day from S3 (Cerner patient and appointment data).
- Persisted records in MySQL and triggered patient reminder workflows with error handling and monitoring.

AI Phone Scheduling–EMR Integration

Node.js, AWS API Gateway, Lambda, MySQL, REST APIs

- Built authenticated API Gateway endpoints with Yosi-first, EMR-fallback patient lookup, exposing provider availability and open slots.
- Synchronized appointment create/reschedule/cancel events across First Outcomes, Yosi and the EMR.

UrgentIQ EMR Integration (Bulk Appointment Pulling)

Node.js, MySQL, AWS Lambda, CloudWatch

- Fetched bulk appointment data via token-based EMR APIs (with expiry validation) and stored encrypted patient data in MySQL.
- Ran it as a serverless Lambda workflow with CloudWatch logging and monitoring.

ModMed EMR–Outlook Appointment Integration

Node.js, AWS Lambda, PHP, Microsoft Graph API

- Synced appointment create/update/cancel events between ModMed EMR and Outlook Calendar using Microsoft Graph with token-based auth.
- Added provider-level opt-in controls for accurate syncing and less manual calendar effort.

EDUCATION

KGISL INSTITUTE OF INFORMATION MANAGEMENT

Master of Computer Applications

Coimbatore | 2021 – 2023

CGPA: 7.8

SRI KRISHNA ARTS AND SCIENCE COLLEGE

Bachelor of Computer Applications

Coimbatore | 2018 – 2021

CGPA: 6.9

CERTIFICATIONS

Java Full-Stack Development – **KodNest** | Responsive Web Design – **FreeCodeCamp**
